The **ULTIMATE** source for
your technology needs

STA Technologies

A diversified, technology-based solutions and consulting company

STA Technologies, Inc. is an African-American, woman-owned company founded in January 2002. We are a Diversified Technology-Based Solutions and Consulting firm specializing in A/V communications, physical security, and network integration services for the federal, state and commercial marketplace.

Our highly skilled and experienced professionals can deliver results that exceed your expectation and better suit your business needs. We aim to provide the best quality technology solutions and customer service that will be on target with your mission to accomplish the end result with complete satisfaction.

🌀 Mission 🌀

To provide innovative technology which would meet the needs of our customers and exceed their expectation while building meaningful relationships and trust.

“We value the success of your business”

Excellence without Excuse...

We have successfully developed a reputation based on advanced technological knowledge blended with integrity and reliance

Visual Communications

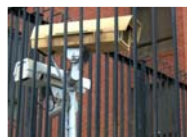

We provide quality A/V systems integration designs and installations for your company; Communications solutions which will engage your customers, evoke rapid response and give you achievable positive results.

Network Integration Services

Network Systems Infrastructure is the key component to your company. Our professional team will engineer and design networks that are proven to be most effective in the overall business operation.

Electronic & Physical Security

Today's Government has heightened awareness of security protection worldwide. We, at STA

Technologies, deliver on security systems integration that supports mission sensitive programs for the Federal agencies and Department of Defense clients.

We are the **ULTIMATE** source for your technology needs.

- STA Technologies is able to engineer, design, install and integrate your network quickly and seamlessly.
- Aside from providing technology solutions, we are in the business of building meaningful relationships and trust.
- We deliver facility-wide integrated solutions that are above inadequate compared to today's technologies and trends.
- Our professional team has strong skill-sets in visual communication, information technology, electronic & physical security.
- *We put our customer's needs first.*
